PROFESSIONAL SUMMARY

Final-year Computer Science student at the International Islamic University Islamabad (CGPA 3.65) specializing in AI agents, automation, and applied machine learning. Completed a machine learning internship at FlyRank AI, an AI Agents & Automation Fellowship with Mentor Tech Hub, and is currently a Level V AI content researcher with the AI Community of Pakistan. Experienced in building agentic workflows (LangChain, LangGraph, CrewAI, n8n, MCP), RAG pipelines, and Java/C++ desktop systems. Seeking an industrial FYP placement or AI/ML internship to apply these skills in production settings.

EXPERIENCE

AI Content Researcher — LEGION Level V — AI Community of Pakistan (AICP) *Aug 2026 – Present*
Learn Ambassador Program, LEGION AI Content Team

- Produced a rank-wise (Basic / Intermediate / Advanced) curriculum outline on Agentic AI and Autonomous AI Systems, covering LangChain, LangGraph, CrewAI, AutoGen, LlamaIndex, Pinecone, and LangSmith.
- Documented core agentic architectures: ReAct, plan-and-execute, orchestrator-worker, and reflexion loops.
- Delivered LEGION Task 02, 03 for Module 1 and 2 : a 20-slide training deck, a 25–30 question MCQ assessment, and a problem-solving assignment.

Machine Learning Intern — FlyRank AI *Jun 2026 – Sep 2026*
8-week capstone program | Mentor: Mirza Aščerić

- Built a Content Refresh / Page Review Priority ranking model to prioritize review of ~30,000 web pages (~50 reviewed/week).
- Applied a client-holdout validation split (GroupShuffleSplit) to reveal an honest Precision@50 of ~0.72, versus a misleadingly high ~0.90 on a naive stratified split.
- Identified and excluded leaky features (trend_pct, trend_direction) that inflated apparent model performance.
- Shipped a logistic regression model that beat the baseline heuristic (~0.32) by roughly 2.25x.
- Published the capstone research paper via GitHub Pages; internship completed with a formal role recommendation.

AI Agents & Automation Fellow — Mentor Tech Hub (MTH Fellowship, Cohort 1, 2026) *Jul 2026 – Aug 2026*

- Designed and deployed the TechNova Employee Policy & Procedure Support Agent, an n8n-based conversational agent accepting both text and voice input.
- Built intent classification with Groq's Llama-3.3-70b-versatile into simple_query / action_required / escalate_to_hr routes.
- Implemented RAG retrieval via a native n8n MCP Server with Gemini embeddings, plus a Slack human-in-the-loop approval step for sensitive actions.
- Added a Deepgram speech-to-text/text-to-speech voice layer and Google Sheets logging for audit trail.
- Deployed the agent on Railway using a Postgres-backed n8n template; resolved a hardcoded GCP credential exposure and various integration bugs.

- Published the project on GitHub: <https://github.com/LaibaSabir1/HR-Policy-Support-Agent-Capstone>

Social Media Team Member — Youth Empowerment

2026

- Supported content creation, communication, and digital engagement as part of the organization's social media team.

PROJECTS

TechNova Employee Policy & Procedure Support Agent

n8n, Groq, Gemini, MCP, Slack, Deepgram — see Experience above for details

- End-to-end agentic automation project; full detail listed under the Mentor Tech Hub fellowship above.

Mobile Technician System

Java, Swing, MS Access, JDBC (DAO Pattern)

- Built a desktop application for managing technician records using a layered DAO architecture separating UI and database logic.

https://github.com/LaibaSabir1/Mobile_Technician_System

Splitwise Expense Minimizer

Python, Graph Algorithms

- Built a greedy/graph-based algorithm to minimize the number of transactions needed to settle group expenses.

https://github.com/LaibaSabir1/Splitwise_Expense_Minimizer

Additional Coursework Projects

- Hospital Management & Emergency System (C++) — graph-based ambulance dispatch using Dijkstra/DFS/BFS with role-based login.
- Delivery Optimization for E-Commerce (C++/graph theory) — TSP, Nearest Neighbor, and Brute Force route optimization.
- OS Drone Delivery Simulation (C) — MLFQ scheduling and semaphore-based synchronization.
- RAG Pipeline — Retrieval-Augmented Generation system built with LangChain, ChromaDB, and OpenAI in Jupyter Notebook.
- Online Course Registration System (OOAD case study) — use cases, domain model, and sequence diagrams for Horizon University.

EDUCATION

Bachelor of Science in Computer Science

International Islamic University, Islamabad (IIUI)

Sep 2023 – Jul 2027 (Expected)

CGPA: 3.65 | 7th Semester

Intermediate in Pre-Engineering (FSc)

KIPS College, G-9 Markaz, Islamabad

Aug 2021 – Aug 2023

TECHNICAL SKILLS

Languages:

- Java (OOP, Swing, JDBC, DAO pattern)
- Python
- C / C++ (multithreading, semaphores, IPC, DSA)
- SQL
- HTML

AI & Agents:

- Agent architecture & prompting (zero-shot, few-shot, CoT, ReAct)
- Tool/function calling
- Structured outputs
- Agent memory (Mem0)
- LangChain
- LangGraph
- CrewAI
- Retrieval-Augmented Generation (RAG)
- Model Context Protocol (MCP)
- n8n workflow automation

ML & Data:

- Machine learning fundamentals
- Logistic regression
- Model validation (GroupShuffleSplit)
- ChromaDB
- FAISS
- HuggingFace embeddings
- Groq & Gemini APIs

Tools & Platforms:

- Git/GitHub
- VS Code
- Visual Studio
- Google Colab
- Jupyter Notebook
- Docker
- Postman
- Kali Linux
- MS Office Suite

CERTIFICATIONS & CREDENTIALS

Anthropic / Claude:

- AI Fluency for Builders, Educators, Students, K-12 Educators, Small Businesses & Nonprofits
- Claude 101 & Claude Platform 101
- Claude Code & Claude Code in Action
- Introduction to Claude Cowork
- Introduction to Agent Skills
- Developing Agents (Parts 1–2)
- Introduction to Model Context Protocol & MCP Advanced Topics
- Claude with Amazon Bedrock
- Claude with Google Vertex AI
- Building with the Claude API
- Teaching the AI Fluency Framework

Microsoft:

- AI Skills Fest 2026 (Credly badge + exam voucher) — AI transformation, generative AI, Microsoft 365 Copilot, AI administration
- Microsoft Applied Skills credential
- Enhance Security Operations Using Microsoft Security Copilot
- Fundamentals of Machine Learning and Artificial Intelligence

Other:

- FlyRank AI — Certificate of Completion (Machine Learning) & Internship Evaluation
- Certificate of Achievement, 4-Day AI Bootcamp (Youth Empowerment)
- Certificate of Achievement, 3-Day AI Bootcamp (Youth Empowerment)
- Building React Apps Using AI Tools (AI Community of Pakistan)
- Machine Learning Crash Course: Logistic Regression

AREAS OF INTEREST

- Artificial Intelligence & Machine Learning
- AI Agents & Automation
- Data Science & Analytics
- Web Development (React.js, AI-integrated apps)
- Algorithm Design & Competitive Programming
